[outdoor](#) [wind](#) [in](#) [supports](#) [kinetic](#) [place](#) [chime](#)

A lightweight spiral wind chime designed to gently rotate with the wind, creating a smooth and hypnotic motion. The shape expands into a 3D spiral when hung, giving a dynamic look even with minimal airflow. Perfect for balconies, gardens, or indoor decoration near a window.

The model is optimized for easy printing without supports. You can scale it to adjust size and flexibility

Works great printed in PLA, PETG, or lightweight filament. For best results, use bright or metallic colors to enhance the spinning illusion.

#### Features:

- Print-in-place spiral design
- No supports required

- Easy and fast print
- Scalable size
- Smooth rotating motion in wind

### Print Settings:

- Layer height: 0.2 mm
- Infill: 10–15%
- Walls: 2–3
- Supports: No
- Brim: Optional (for better adhesion)
