Bamboo wind chimes

I have long wanted to model the shape of bamboo, because I like vases or flower pots with this pattern. This competition gave me the motivation to do it. For the first time, a pretty good result.

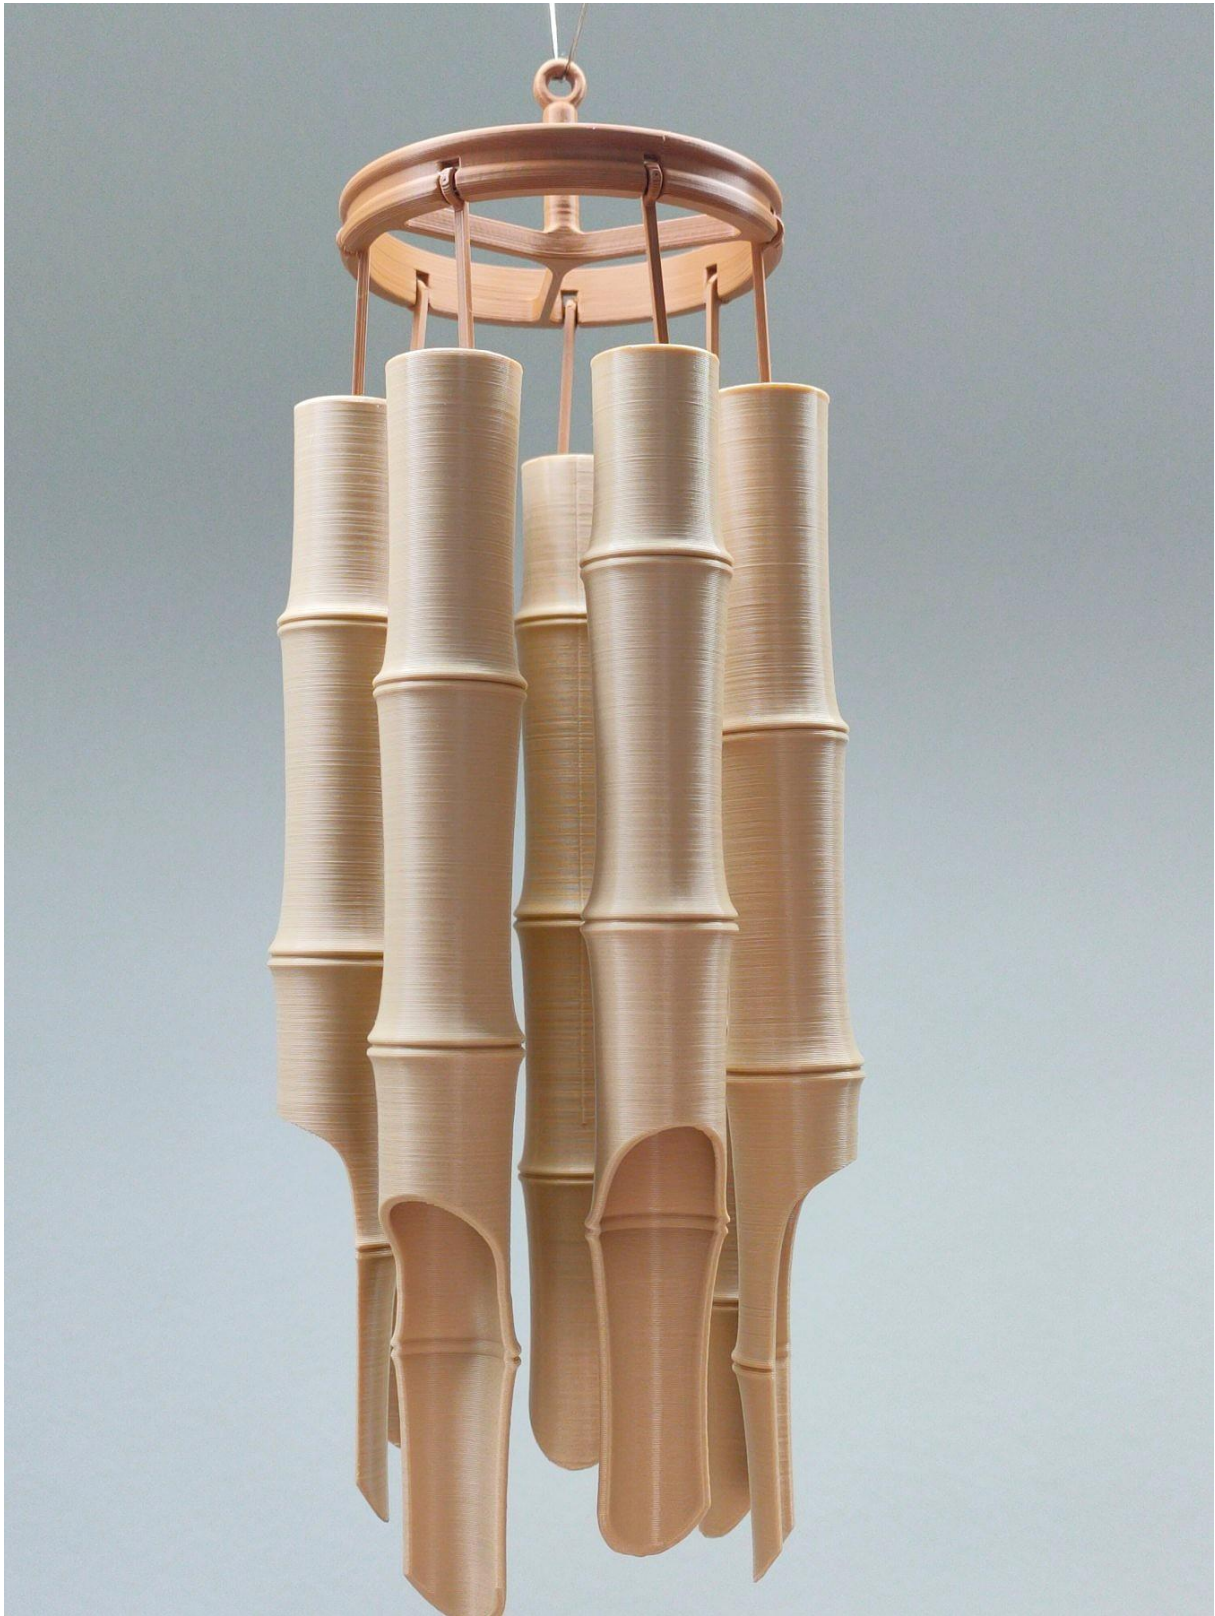

I hope to create more decorative models with these natural shapes.

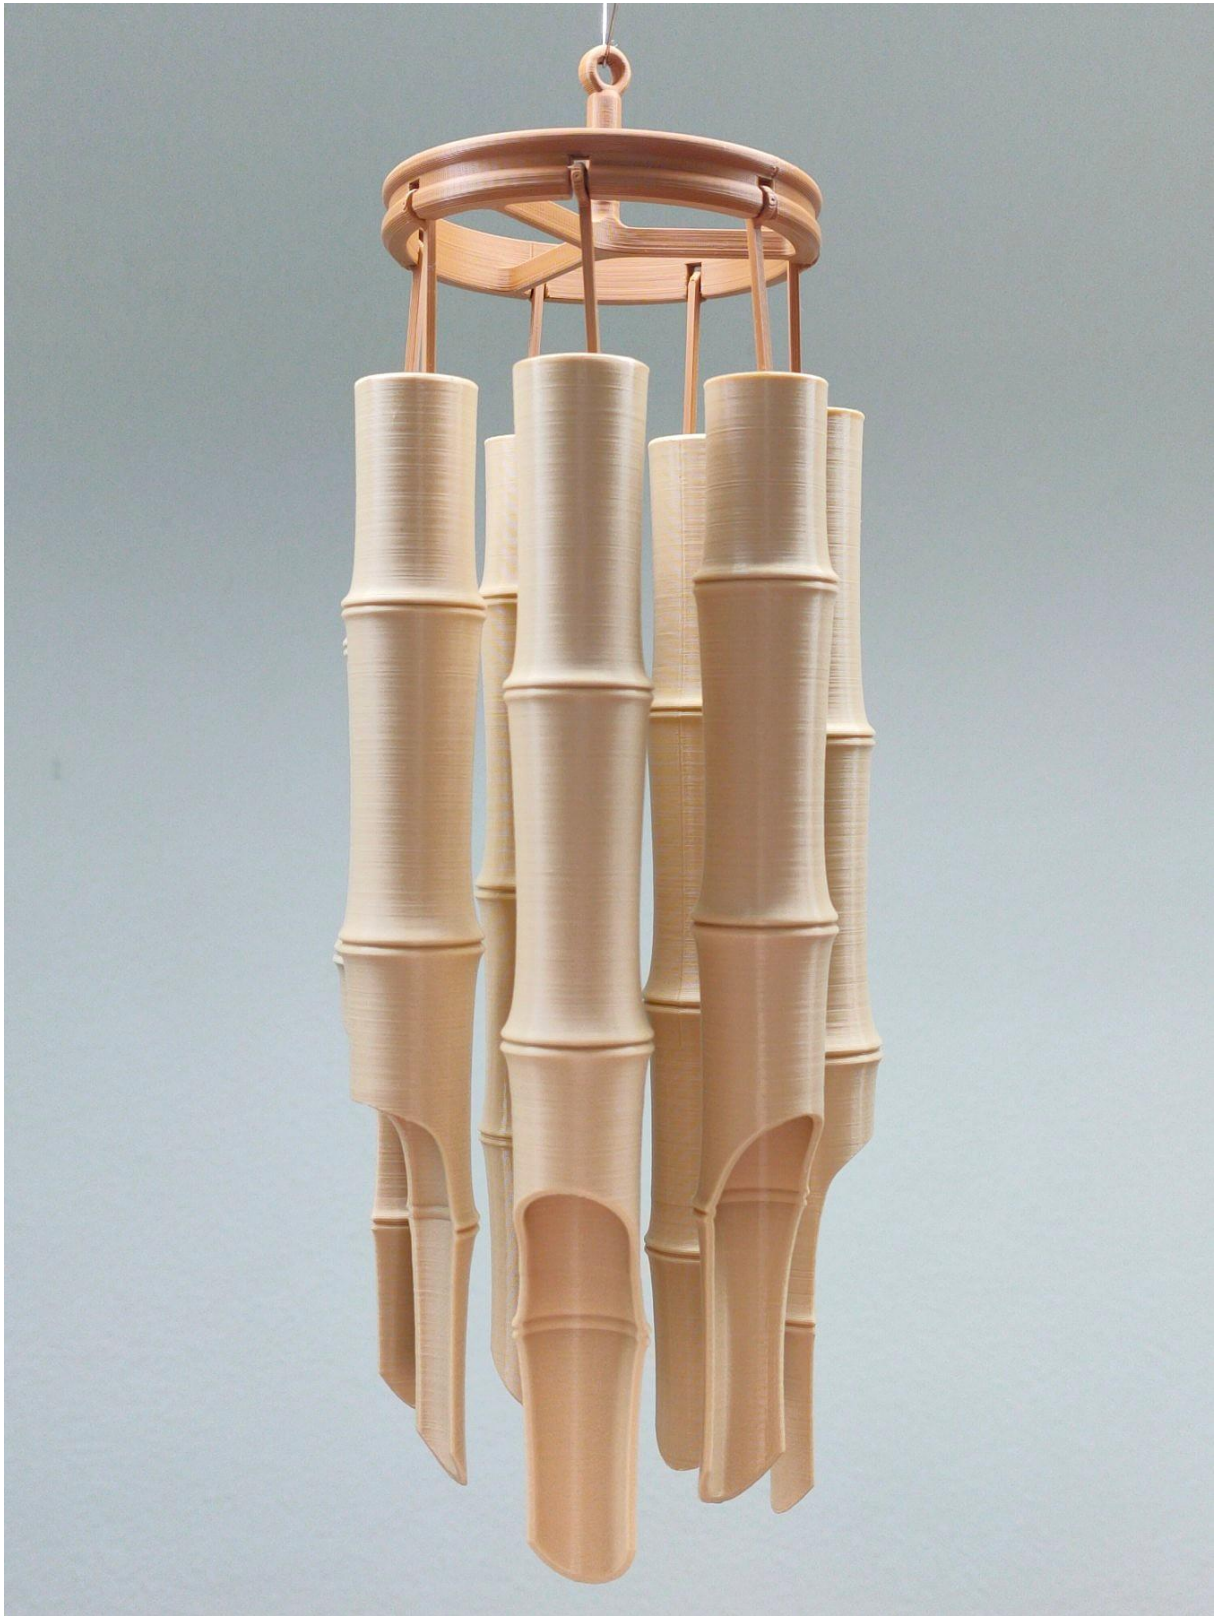

The bamboo wind chimes model has **three parts - bamboo tubes**, a **circular hanging holder** Print in place with hinges and an **inner heart**, which the tubes will knock on. I will also make a circle model without hooks, for those who would like to tie the tubes to a string.

I recommend using a wider brim for a small contact area when printing tubes!!!
